

**Eco-Friendly Water System Cleaning Products**  
**See Us @ Booth 332 – International Workboat Show**  
**New Orleans November 29 – December 1**

Marine growth & scale build-up are major causes of water-cooled equipment failure. Traditional methods of cleaning (such as mechanical brushing or harsh acids) can damage equipment and are potentially harmful to the user and the environment. TRAC Ecological™ has developed a unique line of safe, biodegradable chemicals that efficiently & economically dissolve scale, barnacles, zebra mussels, calcium, rust, lime and other mineral deposits that can reduce water flow.

**Barnacle Buster™** safely cleans raw water cooling systems from intake to discharge without harming equipment, gaskets or seals.

**TRAC's Descaler™** is a safe, biodegradable scale remover designed to dissolve water scale & deposits from within fresh water systems.

**Sew Clean™** is the most effective alternative when it comes to removing uric scale from deep inside black water systems. Formulated specifically to clean sewage systems from toilet to tank, will dissolve clogs which cause plumbing to overflow and create nasty odors.

**PSR™** rids potable water systems of odors & discoloration by attacking the source! Scale builds on low lying, flat sections of systems, allowing bacteria to form. PSR™ targets & removes these areas, bringing new life to fresh water systems.

**Other TRAC eco-friendly products:** **T-Greaser™** is a powerful, butyl-free cleaner/degreaser containing natural extracts, alkaline builders, emulsifiers, and cleaning boosters. Spray it on and watch the toughest stains dissolve. **Trac Hand Cleaner** contains a unique blend of all-natural ingredients providing a pleasant, almond scented, solvent-free cleanser to deep clean the skin and protect against dryness. Efficient, too - one teaspoon cleans hands completely.
