WEST MARINE NOW OFFERS TRAC ECOLOGICAL PRODUCTS Biodegradable Products Keep Onboard Water Systems Clear & Clean

FT. LAUDERDALE, FLORIDA (USA) – TRAC Ecological Products of Ft. Lauderdale, Florida, manufacturer of environment-friendly products to clean marine water systems, announced today that US retailer West Marine now offer TRAC's **Sew Clean™** and **PSR™**.

Sew Clean™ is the most effective alternative when it comes to removing uric scale from deep inside black water systems. Formulated specifically to clean sewage systems from toilet to tank, will dissolve clogs which cause plumbing to overflow and create nasty odors. One gallon is typically all you would need to treat boats up to 50'.

PSR™ rids potable water systems of odors & discoloration by attacking the source! Scale builds on low lying, flat sections of systems, allowing bacteria to form. PSR™ targets & removes these areas, bringing new life to fresh water systems. One gallon is typically all you would need to treat boats up to 50'.

West Marine has nearly 400 stores located in 38 states, Puerto Rico and Canada. Its catalog and Internet channels offer customers approximately 50,000 products. Visit www.westmarine.com or in the US call 1+800.685.4838.
