**ADVANCED DIESEL TECHNOLOGIES  
TO DISTRIBUTE TRAC ECOLOGICAL PRODUCTS IN PUERTO RICO  
Eco-Friendly Products Keep Onboard Water Systems Clear & Clean**

FT. LAUDERDALE, FLORIDA (USA) JANUARY 14, 2008 – TRAC Ecological Products of Ft. Lauderdale, Florida, manufacturer of environment-friendly products to clean marine water systems, today announced that Advanced Diesel Technologies now distributes its unique product line in Puerto Rico.

Marine growth & scale build-up are major causes of water-cooled equipment failure. Traditional methods of cleaning (such as mechanical brushing or harsh acids) can damage equipment and are potentially harmful to the user and the environment. TRAC Ecological™ has developed a unique line of safe, biodegradable chemicals that efficiently & economically dissolve scale, barnacles, zebra mussels, calcium, rust, lime and other mineral deposits that can reduce water flow.

TRAC products available from Advanced Diesel Technologies include:

**Barnacle Buster™** safely cleans raw water cooling systems from intake to discharge without harming equipment, gaskets or seals.

**TRAC's Descaler™** is a safe, biodegradable scale remover designed to dissolve water scale & deposits from within fresh water systems.

**Sew Clean™** is the most effective alternative when it comes to removing uric scale from deep inside black water systems. Formulated specifically to clean sewage systems from toilet to tank, will dissolve clogs which cause plumbing to overflow and create nasty odors.

**PSR™** rids potable water systems of odors & discoloration by attacking the source! Scale builds on low lying, flat sections of systems, allowing bacteria to form. **PSR™** targets & removes these areas, bringing new life to fresh water systems.

A powerful, simple to use descaling tool packaged into a five-gallon bucket, **Port-O-Flush Jr.™** provides portability and versatility while efficiently cleaning small to medium size engines, heat exchangers, air conditioning & refrigeration systems. Tasks which normally take days can now be completed in an afternoon - even by the do-it-yourselfer. Use Port-O-Flush Jr. to cure engine overheating, clogged pipes and poor heat transfer. Cleans small parts, too.

For more information about TRAC Ecological Products, visit [www.trac-online.com](http://www.trac-online.com) or call 1+954.987.2722. Dealers in Puerto Rico interested in offering TRAC products should call Advanced Diesel Technologies in Guaynabo, 787.720.2869.
