**TRAC ECOLOGICAL NAMES SOUTHEAST US SALES REP  
Biodegradable Products Keep Onboard Water Systems  
Clear & Clean**

FORT LAUDERDALE, FL (USA) - TRAC Ecological of Ft. Lauderdale, Florida, manufacturer of environment-friendly products to clean marine water systems, has chosen Rodco Power Products Inc. to represent its product line in eastern Texas, Louisiana and Mississippi.

Marine growth & scale build-up are two major causes of water-cooled equipment failure. Traditional methods of cleaning (such as mechanical brushing or harsh acids) can damage equipment and are potentially harmful to the user and the environment. TRAC Ecological has developed a line of safe, biodegradable chemicals that efficiently & economically dissolve scale, barnacles, zebra mussels, calcium, rust, lime and other mineral deposits that can reduce water flow.

Headed by Donald Rodriguez, Rodco Power Products has over 20 years of experience in marine product sales and marketing. Dealers and boat builders in the southeast US interested in TRAC Ecological products should call 1+504.450.9722.

For more information about TRAC Ecological, visit [www.trac-online.com](http://www.trac-online.com) or call 1+954.987.2722.
