Trac Ecological Cleaning System  
2000 Tiger Tail Blvd B8  
Dania Fl 33004

To whom it may concern

Antarctica called in the services of Trac Ecological Cleaning System to clean out the EVAK toilet system and salt cooling water system on both main engines and generators.

After treatment with their product Trac 1204 the scale build up in the EVAK system and rust and barnacles in the cooling system had gone.

Because of the very satisfying results and flexibility and responsibility of the Trac people we recommend them and we certainly will use Trac in the future!
