## M/Y Mystique Statistics:

LOA: 162 ft.  
G. Ton: 496  
Draft: 5 Ft.  
Speed: 30 Knots, cruise  
Fuel: 20,000 Gal.  
Power: (3) MTU's (7500)THP  
Built: 1988 Oceanfast, Australia

Situation: Barnacle/Scale buildup-internal pipes  
-----

Solution: Trac "Barnacle Buster" (1204)  
-----

Application: Date 10/15/96  
-----

" Prior to Trac treatment we had problems with Barnacle accumulation in our raw water cooling systems." Trac Ecological Cleaning Systems used approximately 100 gallons of Trac "Barnacle Buster" (1204) for a period of (6) hours to clean the Air Conditioning piping and condensers as well as the Starboard/Port Generators and Sea Chests. " To our surprise and delight most Barnacles and Scale were completely dissolved restoring the system to approximately 90% of original capacity!

"We also had the "EVAC Toilet" system, (16 Toilets) cleaned due to calcium obstructions."

The company filled the Toilet system with Trac and let the product sit for (12) hours. The product was recovered into Trac's tanks and the system was opened for inspection.

"The results were outstanding". "cleaned the poop" and calcium from the system restoring literally "like new conditions" We saved many costly hours of plumbing removal (with limited access) and we stayed in the water!

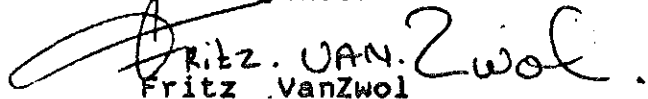

These operations make Trac Cleaning the best alternative available. Quick, Complete, Easy, and environmentally safe. Highly recommended by the crew of Mystique!

Sincerely,

Captain Peter Pritchett
