Mr Leclerc
TRAC ECOLOGICAL CLEANING SYSTEMS
3125 John P. Curci Bay #4
Pembroke Park, FL 33309

Dear Mr Leclerc;

I would like to inform you as to the out come of the LEGACY sea-trials after the cleaning of the 2 Main Engines, 3 Generators and Air-conditioning raw water pipes and systems.

We ran our main engines hard for one hour. The gear box and main engine oil temp and main engine water temp was cooler than before you had started the cleaning. In fact, after recording this information and comparing this with the recordings over the last 3 years we found that this is the best these engines have run (temperature wise) during this period. All Generators and Air-conditioning is running well also.

I must admit, I was a little worried about your method of cleaning. I am now thinking this is the better option after seeing the condition of the pipes before and after the cleaning. To clean this any other way would take more time and money.

I wish I could comment on after sale service, but none is required.

In conclusion, I am very pleased with the work done. Thank you, I look forward to doing business with you in the future.

Christopher Ball, Chief Engineer.
