

Trac Ecological Barnacle Buster is a safe and biodegradable marine scale remover solution.

Trac Ecological Barnacle Buster is a safe and biodegradable marine scale remover specifically formulated to meet an industry wide need for fast, safe, cost-effective alternatives to mechanical cleaning of cooling equipment. With minimal dismantling required, Trac Ecological Barnacle Buster can be safely re-circulated through marine water-cooling systems, dissolving barnacle exoskeletons, rust, and mineral deposits including removal of calcium and lime scale. Most applications are completed within 4 hours!

Types of Applications

Trac Ecological Barnacle Buster can safely be used to remove freshwater scale from:

- Engine's seawater cooling systems
- A/C & refrigeration cooling systems
- Boat bottoms
- Piping
- All types of heat exchangers
- Bow thrusters
- Water makers
- Propellers
- Pumps

- Trac Ecological Barnacle Buster is safe on paint, fiberglass, vinyl, wood, plastics, rubbers, porcelain and most metals if used as directed. **ALWAYS RINSE AFTER USE.**
- **WARNING:** Trac Ecological Barnacle Buster may discolor copper alloys, aluminum, and some electrolytic plating may occur when circulating between dissimilar metals. Zinc anodes will need to be removed.

Availability

- 1 gallon
- 5 gallon pail
- 55 gallon drum
- 250 gallon tote tank
